This practical and inspirational guide to healing from the award-winning, New York Times bestselling author of *The Choice* shows us how to stop destructive patterns and imprisoning thoughts to find freedom and enjoy life. Edith Eger's powerful first book *The Choice* told the story of her survival in the concentration camps, her escape, healing, and journey to freedom. Oprah Winfrey says, "I will be forever changed by Dr. Eger's story." Thousands of people around the world have written to Eger to tell her how *The Choice* moved them and inspired them to confront their own past and try to heal their pain; and to ask her to write another, more "how-to" book. Now, in *The Gift*, Eger expands on her message of healing and provides a hands-on guide that gently encourages us to change the thoughts and behaviors that may be keeping us imprisoned in the past. Eger explains that the worst prison she experienced is not the prison that Nazis put her in but the one she created for herself, the prison within her own mind. She describes the twelve most pervasive imprisoning beliefs she has known—including fear, grief, anger, secrets, stress, guilt, shame, and avoidance—and the tools she has discovered to deal with these universal challenges. Accompanied by stories from Eger's own life and the lives of her patients each chapter includes thought-provoking questions and takeaways, such as: -Would you like to be married to you? -Are you evolving or revolving? -You can't heal what you can't feel. Filled with empathy, insight, and humor, *The Gift* captures the vulnerability and common challenges we all face and provides encouragement and advice for breaking out of our personal prisons to find healing and enjoy life.

Kerryanne Lashley is trying hard to pick up the pieces of her life after suffering a horrible betrayal. Not only did her husband of ten years, her high school sweetheart the man she thought would be hers for a lifetime cheat on her, but he did it with her best friend. Now she's taken to hiding herself away in a ratty apartment, which is all she can afford these days. Kyle Clancy wants out of the little nowhere postcard town as soon as possible. He hadn't set foot in the place since he was a kid, and the only reason he's here now is to try to talk his grandpa into moving to the big city since his grandma's passing. He had no more interest in a relationship of any kind than Kerryanne did, but one fateful encounter on a sidewalk in the early morning sun would soon set these two on a collision course with destiny.

Bellwether Prize winner Hillary Jordan's provocative new novel, *When She Woke*, tells the story of a stigmatized woman struggling to navigate an America of a not-too-distant future, where the line between church and state has been eradicated

and convicted felons are no longer imprisoned and rehabilitated but chromed—their skin color is genetically altered to match the class of their crimes—and then released back into the population to survive as best they can. Hannah is a Red; her crime is murder. In seeking a path to safety in an alien and hostile world, Hannah unknowingly embarks on a path of self-discovery that forces her to question the values she once held true and the righteousness of a country that politicizes faith.

"What does everyone in the modern world need to know? [The author's] answer to this most difficult of questions uniquely combines the hard-won truths of ancient tradition with the stunning revelations of cutting-edge scientific research. [The author discusses] discussing discipline, freedom, adventure and responsibility, distilling the world's wisdom into 12 practical and profound rules for life"--

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

"One of the most interesting and useful books ever written on networking."—Adam Grant *Social Chemistry* will utterly transform the way you think about "networking." Understanding the contours of your social network can dramatically enhance personal relationships, work life, and even your global impact. Are you an Expansionist, a Broker, or a Convener? The answer matters more than you think. . . . Yale professor Marissa King shows how anyone can build more meaningful and productive relationships based on insights from neuroscience, psychology, and network analytics. Conventional wisdom says it's the size of your network that matters, but social science research has proven there is more to it. King explains that the quality and structure of our relationships has the greatest impact on our personal and professional lives. As she illustrates, there are three basic types of networks, so readers can see the role they are already playing: Expansionist, Broker, or Convener. This network decoder enables readers to own their network style and modify it for better alignment with their life plans and values. High-quality connections in your social network strongly predict cognitive functioning, emotional resilience, and satisfaction at work. A well-structured network is likely to boost the quality of your ideas, as well as your pay. Beyond the office, social connections are the lifeblood of our health and happiness. The compiled results from dozens of previous studies found that our social relationships have an effect on our likelihood of dying

prematurely—equivalent to obesity or smoking. Rich stories of Expansionists like Vernon Jordan, Brokers like Yo-Yo Ma, and Conveners like Anna Wintour, as well as personal experiences from King's own world of connections, inform this warm, engaging, revelatory investigation into some of the most consequential decisions we can make about the trajectory of our lives.

Music-Dance explores the identity of choreomusical work, its complex authorship and its modes of reception as well as the cognitive processes involved in the reception of dance performance. Scholars of dance and music analyse the ways in which a musical score changes its prescriptive status when it becomes part of a choreographic project, the encounter between sound and motion on stage, and the intersection of listening and seeing. As well as being of interest to musicologists and choreologists considering issues such as notation, multimedia and the analysis of performance, this volume will appeal to scholars interested in applied research in the fields of cognition and neuroscience. The line-up of authors comprises representative figures of today's choreomusicology, dance historians, scholars of twentieth-century composition and specialists in cognitive science and performance studies. Among the topics covered are multimedia and the analysis of performance; the notational practice of choreographers and the parallel attempts of composers to find a graphic representation for musical gestures; and the experience of dance as a paradigm for a multimodal perception, which is investigated in terms of how the association of sound and movement triggers emotions and specific forms of cognition.

Toxic fire effluents are responsible for the majority of fire deaths, and an increasing large majority of fire injuries, driven by the widespread and increasing use of synthetic polymers. Fire safety has focused on preventing ignition and reducing flame spread through reducing the rate of heat release, while neglecting the important issue of fire toxicity. This is the first reference work on fire toxicity and the only scientific publication on the subject in the last 15 years. Assessment of toxic effects of fires is increasingly being recognised as a key factor in the assessment of fire hazards. This book raises important issues including the types of toxic effluents that different fires produce, their physiological effects, methods for generation and assessment of fire toxicity, current and proposed regulations and approaches to modelling the toxic impact of fires. The

contributors to Fire toxicity represent an international team of the leading experts in each aspect of this challenging and important field. This book provides an important reference work for professionals in the fire community, including fire fighters, fire investigators, regulators, fire safety engineers, and formulators of fire-safe materials. It will also prove invaluable to researchers in academia and industry. Investigates the controversial subject of toxic effluents as the cause of the majority of fire deaths and injuries Describes the different types of toxic effluents and the specific fires that they produce, their physiological effects and methods for generation Provides an overview of national and international fire safety regulations including current and proposed regulations such as a standardized framework for prediction of fire gas toxicity
