Knowledge of how the various parts of the brain are interconnected to form functional systems is a prerequisite for the proper understanding of data from all fields in the neurosciences. Clinical Neuroanatomy: Brain Circuitry and Its Disorders bridges the gap between neuroanatomy and clinical neurology.

A neuron (nerve cell) is the functional unit of the nervous system. They receive and transmit neural impulses. Meaning that, neurons receive, process and integrate information from all regions of the body and send instructions on how body tissues are to respond to environmental and internal events.
