1 Operators who perform <75 procedures/year should develop a defined mentoring relationship with a highly experienced operator who has an annual procedural volume >150 procedures/year.

2 Performance standard: balloon inflation within 90 (± 30) min of hospital admission. 3 Individuals who perform 75 PCI procedures/year.

ACC/AHA Guidelines for Percutaneous Coronary Intervention ...

The ESC recently published guidelines for the general management of acute coronary syndromes (ACS) in patients presenting without persistent ST-segment elevation. 60 The present guidelines focus on PCI to optimize the management of patients presenting with NSTEMI-ACS. Patients demonstrating elevated serum markers [troponin (Tn)-I, Tn-T, or CK-MB] will be subsequently considered to have non-ST-segment elevation myocardial infarction (NSTEMI).
