Click the circle by an answer with the mouse, then click on the Submit button to get a response. You will be told if your answer is correct or not and will be given some comments.

Practice questions: Metamorphic Rocks

Igneous Rocks Igneous rocks form from hot, molten rock that has solidified. Hot molten rock inside the Earth is called magma. Once it reaches the surface, it is called lava. Igneous rocks form when, deep inside the Earth, the temperatures are high enough to melt rock. As this molten rock material rises to the surface, it cools and solidifies ...
