Linde designed the pallet stackers according to the principle of maximum availability with minimum service costs. That is why these trucks, overall, are very stable. Encapsulated electric parts, a robust chassis and maintenance-free three-phase motors increase their life span. Servicing is required only once a year, depending on use.

Pallet Stackers from Linde Material Handling

The electronic truck control enables the extremely sensitive control of industrial trucks. It controls all movements of both the forklift as well as the work hydraulics and monitors the electrical signals in order to prevent malfunctions. The Linde original manufacturer quality ensures the necessary safety and efficiency of the electronic control.
