~~Preparation Of Stilbene Dibromide Lab Report~~

Abstract: The purpose
of this experiment was
to synthesize the second
intermediate (meso-

Access Free Preparation Of

stilbene dibromide) in the E-Stilbene reaction by Bromination. It was hypothesized that if the reaction was heated at 120°C for five minutes the reaction between E-stilbene and the pyridium bromide perbromide would occur, and meso-stilbene would be created.

Stilbenes Preparation
and Analysis 1.1

General The name for
stilbene

(1,2-diphenylethylene)

was derived from the

Greek word stilbos, which
means shining. There are

two isomeric forms of 1,2-
diphenylethylene:

(E)-stilbene (trans-

Access Free Preparation Of

stilbene), which is not sterically hindered, and (Z)-stilbene (cis-stilbene), which is sterically hindered and therefore less ...

The flask was swirled to dissolve all the stilbene.

Approximately 15cm³ of 10% bromine-dichloromethane solution were carefully measured. 5cm³ of the bromine solution were added to the solution of stilbene and contents were swirled until the reddish brown colour of the bromine solution
