One of the toughest things to do when it comes to completing a voluminous and challenging PhD research project is the proposal. The thing about the PhD research proposal is that you have to encapsulate everything that you want to accomplish, communicate in a concise way what you want to do, the resources that it will require, and finally you have to convince the reader of the viability and necessity of the project. It's difficult to know where, to begin with writing something like this ...

[Well-Written PhD Research Proposal Sample](#)

A research proposal should present your idea or question and expected outcomes with clarity and definition – the what. It should also make a case for why your question is significant and what value it will bring to your discipline – the why. What it shouldn't do is answer the question – that's what your research will do. Why is it important?
