The Consumer Rights Act is a vital and far-reaching piece of legislation containing provisions specific to contract and consumer law, criminal law, and competition law. It sets out a much-needed framework to consolidate the key consumer rights surrounding contracts for goods, services, and digital content, as well as the law relating to unfair terms in consumer contracts. The Act introduces easier routes for consumers and SMEs to challenge anti-competitive behavior through the Competition Appeal Tribunal, as well as confirming enforcers' powers to investigate potential breaches of consumer law. Ultimately, the Act gives civil courts and public enforcers greater flexibility to take the most appropriate action for consumers when dealing with breaches of consumer law. This Blackstone's Guide, written by a team of leading experts in the field, provides clear and concise coverage of the Consumer Rights Act's history, scope, and application. It is the complete resource for anyone looking for an introduction to this wide-ranging Act. The Blackstone's Guide Series delivers concise and accessible books covering the latest legislative changes and amendments. Published soon after enactment, they offer expert commentary by leading names on the scope, extent and effects of the legislation, plus a full copy of the Act itself. They offer a cost-effective solution to key information needs and are the perfect companion for any practitioner needing to get up to speed with the latest changes.

Presents a broad range of international findings in online consumer protection. Covers the nature of online threats, consumer concerns, and techniques for online privacy protection.

This book provides a critical analysis of how digitisation affects established concepts and policies in consumer law. Based on evidence of the actual experience and problems encountered by consumers in digital markets, the book offers a ground-breaking study of the main issues arising in relation to the application of general consumer and sector-specific law. An interdisciplinary team of researchers from the Centre for the Study of European Contract Law (CSECL) and the Institute for Information Law (IViR), both University of Amsterdam, combine their expertise in general consumer and contract law, telecommunications law, media law, copyright law and privacy law in a joint effort to point the way to a truly cohesive European Framework for Digital Consumers and the Law. Topics in this book include the characteristics of digital content markets and how they relate to traditional consumer law; consumer concerns, reasonable expectations and how they are protected by law; the difficult question of the classification of digital content; legal questions triggered by prosumers and underage consumers; the feasibility and future of the information approach to consumer protection; the role of fundamental rights considerations, and the legal implications of an economy that uses personal data as the new currency. Digital Consumers and the Law is an important analysis for all those interested or involved in the regulation of digital content markets. With its comprehensive discussion of a wide range of fundamental as well as praxis-oriented questions, it is an essential read for academics, policy makers, members of the content industry as well as consumer representatives.

Traditionally, consumer law has played an instrumental role in the EU as a tool for market integration. There are now signs in the new EU legal framework and jurisprudence that this may be changing. The Lisbon Treaty contains provisions affecting consumer law and, at the same time, it grants binding legal force to the EU Charter, which in turn adds a fundamental rights dimension to consumer protection. This evolution, however, is still at an early stage and may be thwarted by conflicting trends. Moreover, it may generate tensions between social objectives and economic goals. This book provides the first comprehensive analysis of these developments and examines new avenues that may be opening for consumer law, focusing on three key areas: financial services, electronic communication and access to justice. Through a systematic analysis of relevant cases, the book traces the development of a human rights dimension in consumer law and details the ramifications that the post-Lisbon legal framework may have on consumer protection and policy. This book concludes by proposing new directions in consumer law, striking a compromise between social and economic demands.

Papers presented at a national workshop held during 4-8 August 2005; in Indian context.

The Dawn of Consumer Protection in Tanzania builds on the author's one decade of on-the-ground experience on consumer protection in Tanzania. The book highlights challenges and opportunities facing consumers in Tanzania and Africa in general. It outlines the antidotes of consumer protection and further addresses the hurdles that hold back consumer protection. This book provides an historical perspective of consumer protection development that has been made over decades. The book outline the concerted efforts made by Tanzania in setting up consumer protection mechanism enshrined in regulatory and competition authorities. It brings to light the weaknesses of many laws which make protection difficult. Thus, the book calls for a comprehensive consumer protection legal framework, policy and laws. The Dawn of Consumer Protection in Tanzania sets out a new paradigm of a needed and responsive consumer protection in Tanzania, which is built on strong consumer protection policy and law. It argues extensively for the need for a three-tiered-legal framework consumer protection model, which creates checks and balances in the market. Targeted Reader: Academicians, Researchers, Policy Makers, Consumer Associations, Law Enforcers and General Public.
