Editing and Montage in International Film and Video presents a theoretical and practical approach to the art of editing. In this book, Luís Fernando Morales Morante explores the international history, technology, theory, practical techniques, psychology, and cognitive effects of editing across a range of media from around the world, featuring case studies from film, dramatic television, news media, music videos, commercials, and mobile-delivered formats, from the films of Sergei Eisenstein to Michael Jackson's "Thriller" to coverage of the 2012 U.S. presidential elections. The book includes self-study exercises throughout to help readers put theory into practice.

This pocket-sized, illustrated guide covers every significant make and model of car sold in Europe and North America during the 2006-2007 model year, from giants like Ford and VW to small-scale manufacturers such as Morgan and Noble. Each model is pictured in color, with a data table providing vital statistics to enable comparisons between models. Providing full details for over 700 cars and stretching to 400 pages, this is a must-have reference source and a useful "spotter's guide" for all car enthusiasts.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

This book investigates the role that foreign direct investment (FDI) in central-eastern and southern Europe has played in the post-crisis period, comparing patterns across countries and sectors. An overarching objective of this publication is to assess the extent to which FDI can still be seen as a key driver of economic development, modernisation and convergence for Europe's low- and middle-income economies, taking into account also the risks and limiting factors associated with FDI.

Economic arrangements of Romanies are complexly related to their social position. The authors of this volume explore these complexities, including how economic exchanges forge key social relationships of gender and ethnicity, how economic opportunities are constructed and seized, and how economic success and failure are transformed into attributes of social persons. They explore how, despite — or perhaps because of — their unstable and ambiguous position within the market economy, shared today with a growing number of people facing precarity and informalisation, Roma and Gypsy communities continuously re-create more or less viable economic strategies. The ethnographically based chapters share accounts of socially and economically vulnerable populations that face their situation with self-determination and creativity.

NEW YORK TIMES BESTSELLER \* From the pages of Vogue to the runways of Paris, this "captivating" (Time) memoir by a legendary style icon captures the fashion world from the inside out, in its most glamorous and most cutthroat moments. "The Chiffon Trenches honestly and candidly captures fifty sublime years of fashion."--Manolo Blahnik NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR \* Fortune \* Garden & Gun \* New York Post During André Leon Talley's first magazine job, alongside Andy Warhol at Interview, a fateful meeting with Karl Lagerfeld began a decades-long friendship with the enigmatic, often caustic designer. Propelled into the upper echelons by his knowledge and adoration of fashion, André moved to Paris as bureau chief of John Fairchild's Women's Wear Daily, befriendng fashion's most important designers (Halston, Yves Saint Laurent, Oscar de la Renta). But as André made friends, he also made enemies. A racially tinged encounter with a member of the house of Yves Saint Laurent sent him back to New York and into the offices of Vogue under Grace Mirabella. There, he eventually became creative director, developing an unlikely but intimate friendship with Anna Wintour. As she rose to the top of Vogue's masthead, André also ascended, and soon became the most influential man in fashion. The Chiffon Trenches offers a candid look at the who's who of the last fifty years of fashion. At once ruthless and empathetic, this engaging memoir tells with raw honesty the story of how André not only survived the brutal style landscape but thrived--despite racism, illicit rumors, and all the other challenges of this notoriously cutthroat industry--to become one of the most renowned voices and faces in fashion. Woven throughout the book are also André's own personal struggles that have impacted him over the decades, along with intimate stories of those he has turned to for inspiration (Diana Vreeland, Diane von Fürstenberg, Lee Radziwill, to name a few), and of course his Southern roots and ongoing faith, which have guided him since childhood. The result is a highly compelling read that captures the essence of a world few of us will ever have real access to, but one that we all want to know oh so much more about.

Managing uncertainty and inconsistency has been extensively explored in Artificial Intelligence over a number of years. Now with the advent of massive amounts of data and knowledge from distributed heterogeneous, and potentially conflicting, sources, there is interest in developing and applying formalisms for uncertainty and inconsistency widely in systems that need to better manage this data and knowledge. The annual International Conference on Scalable Uncertainty Management (SUM) has grown out of this wide-ranging interest in managing uncertainty and inconsistency in databases, the Web, the Semantic Web, and AI. It aims at bringing together all those interested in the management of large volumes of uncertainty and inconsistency, irrespective of whether they are in databases, the Web, the Semantic Web, or in AI, as well as in other areas such as information retrieval, risk analysis, and computer vision, where significant computational efforts are needed. After a promising First International Conference on Scalable Uncertainty Management was held in Washington DC, USA in 2007, the conference series has been successfully held in Napoli, Italy, in 2008, and again in Washington DC, USA, in 2009.
