For more than three decades, Bernard Bass ' s handbook has been indispensable bible for every serious student of leadership. For thirty-three years and through three editions, Bass & Stogdill's Handbook of Leadership has been the indispensable bible for every serious student of leadership. Since the third edition came out in 1990, the field of leadership has expanded by an order of magnitude. This completely revised and updated fourth edition reflects the growth and changes in the study of leadership over the past seventeen years, with new chapters on transformational leadership, ethics, presidential leadership, and executive leadership. Throughout the Handbook, the contributions from cognitive social psychology and the social, political, communications, and administrative sciences have been expanded. As in the third edition, Bernard Bass begins with a consideration of the definitions and concepts used, and a brief review of some of the betterknown theories. Professor Bass then focuses on the personal traits, tendencies, attributes, and values of leaders and the knowledge, intellectual competence, and technical skills required for leadership. Next he looks at leaders' socioemotional talents and interpersonal competencies, and the differences in these characteristics in leaders who are imbued with ideologies, especially authoritarianism, Machiavellianism, and self-aggrandizement. A fuller examination of the values, needs, and satisfactions of leaders follows, and singled out for special attention are competitiveness and the preferences for taking risks. In his chapters on personal characteristics, Bass examines the esteem that others generally accord to leaders as a consequence of the leaders' personalities. The many theoretical and research developments about charisma over the past thirty years are crucial and are explored here in depth. Bass has continued to develop his theory of transformational leadership -- the paradigm of the last twenty years -- and he details how it makes possible the inclusion of a much wider range of phenomena than when theory and modeling are limited to reinforcement strategies. He also details the new

incarnations of transformational leadership since the last edition. Bass has greatly expanded his consideration of women and racial minorities, both of whom are increasingly taking on leadership roles. A glossary is included to assist specialists in a particular academic discipline who may be unfamiliar with terms used in other fields. Business professors and students, executives in every industry, and politicians at all levels have relied for years on the time-honored guidance and insight afforded by the Handbook.

Scores of books and articles have been written in the popular press and mainstream marketplace about leadership: who leaders are, what they do, and why they matter. Yet in academia, there is a dearth of rigorous research, journal articles, or doctoral programs focused on leadership as a discipline. Why do top business schools espouse mission statements that promise to "educate the leaders of the future"- yet fail to give leadership its intellectual due? The Handbook of Leadership Theory and Practice seeks to bridge this disconnect. Based on the Harvard Business School Centennial Colloquium "Leadership: Advancing an Intellectual Discipline" and edited by HBS professors Nitin Nohria and Rakesh Khurana, this volume brings together the most important scholars from fields as diverse as psychology, sociology, economics, and history to take stock of what we know about leadership and to set an agenda for future research. More than a means of getting ahead and gaining power, leadership must be understood as a serious professional and personal responsibility. Featuring the

thinking of today's most renowned scholars, the Handbook of Leadership Theory and Practice will be a catalyst for elevating leadership to a higher intellectual plane - and help shape the research agenda for the next generation of leadership scholars.

Bernard M. Bass has incorporated a decade of new findings on the newest theories and models of leadership; intellectual and interpersonal competence; motivation; the nature of power and Machiavellianism; charismatic and transformational leadership; leadership and women, Hispanics, and Orientals; leadership succession; substitutes; culture; and the role of leadership and organizations in dealing with stress, crisis, and disaster.

With contributions from those who have defined that territory, this volume is not only a key point of reference for researchers, students and practitioners, but also an agenda-setting prospective and retrospective look at the state of leadership in the twenty-first century. It evaluates the domain and stretches it further by considering leadership scholarship from every angle, concluding with an optimistic look at the future of leaders, followers and their place in organizations and society at large. Each section represents a distinctive slant on leadership: - Macro perspectives - including strategic leadership, organization theory, charismatic leadership, complexity leadership, and networks. - Political and philosophical perspectives - including distributed leadership, critical leadership, ethics, the military and cults. - Psychological perspectives - including personality, leadership style and contingency theories, transformational leadership, exchange relationships, shared leadership, cognition, leadership development, gender, trust, identity and the 'dark side' of leadership. - Cultural perspectives - including spirituality, aesthetics, and creativity. - Contemporary and emergent perspectives - followership, historical methods, virtual leadership, emotions, image, celebrity, and the quest for a general theory of leadership
