This invaluable guide takes a step-by-step approach to the most common and popular theatre production practices and covers important issues related to the construction of wooden, fabric, plastic, and metal scenery used on the stage. This new edition of the Illustrated Theatre Production Guide uniquely shows you how to build scenery through detailed lessons and hundreds of drawings. The illustrations make this book like no other and offers solutions to problems that you face, from rigging and knot tying, to drapery folding and the most detailed information on metal framing available. Written for the community theatre worker who has to be a jack of all trades and the student who needs to learn the fundamentals, respected author John Holloway teaches in a way that covers the necessities but doesn't bog you down with heavy language and boring verbosity. New features in this book range from expanded information on metal framing and foam construction to brand new elements such as a chapter on stage management and an extremely helpful Website with videos -- meant to go along with the informative section on projects. These videos take you from the drawings and descriptions in the book to the video instructions that will help you learn visually. A must have for the theatre professional as a guide to refer back to over and over again.

How to Build a Cheap Chopper was originally written to give chopper builders of the day a way to build cool, functional choppers for cheap money. Instead of building bikes out of a catalogue, readers were encouraged to combine a donor bike with an aftermarket frame. With a Sportster or Metric bike as a foundation, and a hard-tail frame, a complete bike could be assembled for less than \$5,000, sometimes much less. Today, there's a whole new generation of riders looking to build simple, functional, unique choppers and bobbers based on everything from a 200cc Honda to the old classic Shovelhead or Panhead engines. No matter which drivetrain they choose, there remains the need to build bikes that work, bikes that are safe to ride, bikes that are fun! How to Build a Cheap Chopper- Revised starts with a look at the basics. The first chapters cover brakes, drivetrains, and frame geometry. The second half of the book shows readers how to actually assemble a bike. Four start-to-finish assemblies done at professional shops take the reader from a pile of parts to a finished, running motorcycle.

Choppers are hot again. All you need to decide is what style you want and this book will guide you through the building sequences. It shows how to build a genuine old chopper or a chopper that looks old and has the conveniences of today, such as electric start and functioning brakes.

Turn a run-down fiberglass boat into a first-class yacht Since it first appeared in 1991, Don Casey's This Old Boat has helped tens of thousands of sailors refurbish older fiberglass boats and has become a revered classic among boat rehabbers. This second edition is revised from first page to last with new information on electrical systems, diesel engines, refrigeration, resins, plumbing and more. Plus, more than 600 newly created illustrations enhance the book's beauty as well as its utility.

The Ambassadeur 2500C, a small casting reel capable of handling fine lines and light baits, was first produced in 1975. This book provides a comprehensive history and taxonomy of this legendary family of fishing reels, which is cherished and admired by anglers, collectors, and tournament casters alike. Find information on variations from 1975 to the present, Ambassadeur De Luxe versions and other special editions, fakes, tournament modifications, and market prices, as well as detailed tables and charts with exhaustive technical information. Since its invention, the 2500C has been followed by 60 further types, all crafted around the same general principles. The current casting world record for 5/8-ounce plugs was set with an original Ambassadeur 2500C, and the reel has acquired such a trusted reputation that many anglers refuse to fish with any other type of reel.

Includes jargon, sports slang, and ethnic and regional expressions

Part history, part autobiography, Eksteins relates the tragic story of the Baltic nations before, during, and after World War II through personal stories from his family. Photos and map.

This Old House meets Wayne's World in this zany guide to designing and building tiny homes Derek Diedricksen has always had a love for small, modest houses ever since his father gave him the book Tiny Tiny Houses by Lester Walker for his tenth birthday. Combining his artistic abilities, wild imagination, and his passion for small houses, he self-published Humble Homes, Simple Shacks, Cozy Cottages, Ramshackle Retreats, Funky Forts, and Whatever the Heck Else we could Squeeze in Here in 2009. This book is a collection of Diedricksen's creative/imaginative sketches for building small houses, shacks, cottages, and forts. The sketches are accompanied with hand-written commentary, both instructive and comical. Derek's main purpose is to get your creative juices flowing and encourage you to get off the couch and use your hands. Believing that specific building plans squash creativity, he avoids too many detailed instructions, giving you the chance to put your own creative spin on your very own small abode (even if it is just in your imagination).
